The $2.4 billion Parramatta Light Rail will connect Westmead to Carlingford via the Parramatta CBD and Camellia, transporting around 28,000 people every day to key destinations, new communities and essential services. It is expected to open in 2023.

Work to identify and relocate utility services at Camellia will start in June 2020 and take about three months to complete, weather permitting.

Parramatta Connect has been engaged by Transport for NSW to complete this work.

Upcoming Work: Grand Avenue, Camellia

Work will include:
- Installing concrete barriers
- Removing vegetation in accordance with environmental approvals
- Locating existing underground services using vacuum trucks
- Excavating, concrete work and backfilling
- Installing conduits/steel pipes
- Removing street light poles and overhead cables.

See overleaf for map showing the location of work.

When will the work take place?

Most of this work will be carried out at night, between 7pm and 7am. Out-of-hours work is needed because the high traffic and pedestrian activity delivering the work during the day is likely to create an increased risk to public safety and/or road traffic. Noisy work will be done as early in the night shift as possible and respite periods will be provided. Where traffic volumes and public safety allows, works will be carried out during the day, between 7am and 7pm.

Traffic and pedestrian access

Traffic management will include temporary road, footpath or lane closures, contraflow and removal of any kerbside parking within the work zone.
Where work is required across driveways this will be done in a staged approach to ensure access is maintained. Should access be unable to be maintained, access will be provided with minimal delay by placing steel plates allowing for safe access to the premises. Please follow the direction of traffic controllers and signs and proceed carefully.

**What equipment will be used?**
Equipment will include, but is not limited to, concrete saws, jackhammers, compactors, excavators, drills, power tools, hand-held tools, water carts, trucks, light vehicles, lighting towers for night works and vacuum excavation trucks.

**How will the work affect you?**
There may be some noise, dust and vibration associated with this work. We understand our work may be disruptive and we apologise for the inconvenience. We will make every effort to minimise impacts by:
- Completing work activities during standard construction hours, where possible
- Providing respite periods for any high noise activities
- Completing the noisiest activities first and using measures such as noise blankets and non-tonal reversing beepers where possible
- Monitoring and reviewing noise levels
- Consulting with directly affected residents and businesses
- Using water carts to wet down areas as required
- Turning off equipment and vehicles when not in use.

**Contact us**
To find out more about the project, or to discuss your preference for work hours, please call our 24-hour Community Information Line on 1800 139 389 or visit the Parramatta Light Rail website [www.parramattalightrail.nsw.gov.au](http://www.parramattalightrail.nsw.gov.au), or email parramattalightrail@transport.nsw.gov.au. If you have any urgent enquiries or complaints during this work please call our 24-hour Community Information Line on 1800 139 389. A more detailed work schedule can also be found at [www.parramattalightrail.nsw.gov.au/weekly-works](http://www.parramattalightrail.nsw.gov.au/weekly-works).
